DIGITAL AND SURVEILLANCE SECURITY TECHNOLOGY MANAGEMENT

A SAFER INTERNET SPACE FOR BUSINESS AND FINANCIAL SERVICES

The digital economy in Africa has played a significant role in driving the continent's GDP, producing over 300,000 formal jobs and over 1.1 million informal jobs. Today, the ICT sector is a major contributor to national GDP calculation. However, as it has its upside, it also has its downside issues. For instance, according to the International Data Corporation (IDC), the rise in digital technology application and adoption in Africa has also caused a tandem rise in fraudulent online transactions estimated to cost <u>USD 8 billion annually</u> in cybercrime

We at Authenticate Digital Security believe that we can contribute our own service to reduce and eventually prevent crimes and false identities in transacting businesses in our economy today.

Strengths

Our Strength gives us Hope.

Our major strength relies on our goal of providing a safe digital society for this emerging market that we have, and also encouraging a secure way of doing business.

- Our professional Team structure cutting across private and pubic sector individuals combining for a collective goal

- Our technical knowledge and problem solving skillset and experience.

- Partnerships with Government organisations and Stakeholders in the security sector as well as private sector

Weaknesses

Every Business Faces Weaknesses

Weakness's of growing businesses in Africa today ranges from funding to poor connection structure and lack of adequate education of services to final consumers.

- Tougher competition in the market with more resources and variations of services that have been made even cheaper below market standard.

- Crime fights back, the more you put measures in place to become protective the more the system. becomes tougher for you to navigate, via policies and executive restrictions.

- Financial support to advance research and provide more advance digital security services.

OPPORTUNITIES

A FUTURE COMPLETELY RELIANT ON TECHNOLOGY

- GROWING NUMBER OF START UPS IN AFRICA IN ADDITION TO THE GROWING NUMBER OF FINANCIAL SERVICE BASED START UPS.
- HIGH DEMAND FOR DIGITAL SECURITY SERVICES IN RELATION TO DEMANDING FINANCIAL TRANSACTIONS..
- THE FUTURE IS LOOKING TECH FILLED , WHY NOT?

THREATS

WHERE THERE IS PROGRESS THERE IS RESISTANCE.

- Constance change in cost of Technological development.
- Soaring nature of Digital fraud around the continent.
- A standard solution must require high capital to develop and maintain standards .
- Fintechs ignorant nature of customer data's
- Need for Protection against rising cyber security threats across the continent.
